

FALCOWEB

Control Your **Access Control** from the **World Wide Web**

FalcoWeb at your fingertips - It delivers extensive access control capabilities anytime, from anywhere that you have an internet access. Any existing PC with a web browser and an internet connection can be used to take advantage of FalcoWeb's complete suite of access control functions - anytime, from any place on the globe.

FalcoWeb system is composed of the access control hardware, the access control application and an internet browser. The intelligent controller hardware with the software application over TCP/IP through internet/intranet or wireless connection. By utilizing true distributed processing, the intelligent controller can determine who can or cannot access a door.

It is also extremely flexible, having a myriad of useful reports that can be filtered in ways suitable to each customer's needs. FalcoWeb's design allows for easy integration to over 400 models of IP network cameras and the company's HR database.

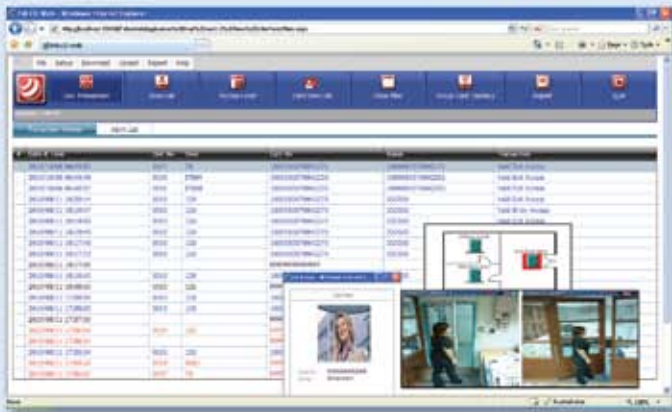

FALCOWEB features

- Network ready
- Industry leading hardware with modularity for flexible, reliable solutions
- Up to 150,000 users and 80,000 event transactions
